

Troon Companies, Inc. is a Commercial Roofing Company and Class A General Contractor, that specializes in roofing and large loss insurance claims for the exterior envelope of commercial and industrial buildings. Troon Companies also provides a wide range of services pertaining to capital improvements, tenant improvements, structure maintenance, and special projects.

Large Loss Insurance Claims – How We Do It

- Troon represents commercial and industrial property owners for their insurance claims related to property damage caused by natural events including hail, snow, water and fire.
- Troon conducts a complimentary inspection of the property and prepares a comprehensive written assessment of the damage, supported by photo / video exhibits.
- Troon then prepares an estimate to repair the damage using Xactimate, the same software that is used by most insurance carriers.
- Troon negotiates with the owner's insurance carrier, on behalf of the owner, to assure that a claim has been accurately prepared, submitted, reviewed and awarded.
- Once Troon secures the insurance award for the property owner, Troon provides all construction services necessary to return the damaged property to its pre-event condition.
